- a/ Types of Service; 1- Physicians'; 2- Surgeons'; 3- Hospital; 4 - Drugs; 5- Dental.
- b/ Figures shown represent the average annual membership fee as of Feb. 1942 for all units in the respective states offering the indicated service.
- c/ These figures do not apply for the entire membership shown on this line, though the rates shown may be considered representative. The figures cover activities of the units operating on a fee-for-service basis shown by entries in the columns recording charges and services under the various state headings to have submitted reports for April. The totals of such units, counties and members are as follows.

Types of Service	No. of Units	No. of Counties	Membership		Per cent of total membership
			Families	Persons	
Physicians and Surgeons	506	639	66,786	344,412	69.0
Hospital	264	330	38,547	197,950	64.3
Drug	190	222	29,296	153,405	63.3
Dental (Separate units)	109	118	14,150	75,069	53.4
Dental (combined units)	74	104	9,629	46,894	65.4

- d/ This figure represents the amount paid rather than approved charges for units paying for services on the basis of the number of families for which each physician, hospital, or dentist has accepted responsibility for professional care. U. S. and regional totals also represent the experience of these units operating on the Capitation plan and submitting reports for the month of April, 1942.
- e/ For reporting units operating on a fee-for-service plan. Total members (persons) on the basis of which these rates have been estimated include the membership of all reporting units which offer hospital service, regardless of whether or not any hospital service was rendered this month. For units in each state reporting hospital service without reporting the number of days hospitalized, the number of days has been estimated on the basis of the average days per person hospitalized during the month for units reporting this information for the same state. In states having no units reporting hospital days no rate is given.
- f/ These units pay no more than fifty per cent at the end of each month or quarter, delaying further payments until the end of the year. Per cent paid is estimated on the basis of amounts that could be paid if all funds available for payment of bills this month were distributed.
- g/ Membership for these units taken from reports for months other than April
- h/ These units pay charges for drugs in excess of \$1.50 for each case of illness. Totals shown therefore represent only the excess.

Region XII Texas f/	2	2	129	600					

- a/ These figures are not based on reports from the entire membership shown on this line though the rates shown may be considered representative. The figures cover activities of units operating on a fee-for-service basis shown by entries in the columns recording charges under the various state headings to have submitted reports for May. The totals of such reporting units, counties, and members are as follows:

Type of Service	No. of units	No. of counties	Membership		Per cent of total membership
			Families	Persons	
Physicians' and surgeons'	515	626	66,951	351,572	70.0
Hospital	260	323	39,329	206,681	65.8
Drug	185	214	29,551	157,433	64.5
Dental (Separate units)	125	134	15,652	83,867	57.6
Dental (combined units)	58	87	7,608	37,551	54.6

- b/ This figure represents the amount paid rather than approved charges for units paying for services on the basis of the number of families for which each physician, hospital, or dentist has accepted responsibility for professional care. U. S. and regional totals also represent the experience of only those units which have submitted reports for May.
- c/ For reporting units operating on a fee-for-service plan. Total members (persons) on the basis of which these rates have been estimated include the membership of all reporting units which offer hospital services regardless of whether or not any hospital service was rendered this month. For units in each state reporting hospital service without reporting the number of days hospitalized the number of days has been estimated on the basis of the average number of days per person hospitalized during the month for units reporting this information in the same state. For state having no units reporting number of days of hospitalization, no rate is given.
- d/ These units pay no more than fifty per cent on charges at the end of each month or quarter, delaying further payment until the end of the year. The entry under Per cent paid for these units is the estimated percentage which could be paid if all funds available for payment of bills this month were distributed.
- e/ These units pay charges for drugs in excess of \$1.50 for each case of illness. Totals shown therefore represent only this excess.
- f/ Membership totals for these units have been taken from reports for months other than May.
